

CLAIMS

What Is Claimed Is:

1. A pet food storage container, comprising:

a housing defining a main chamber and an opening for accessing said opening, said main chamber defining a height;

a platform movable along said height; and

a lid configured to cooperate with said housing to close said opening.
2. The container of Claim 1, wherein said housing further comprises at least one rolling means for enabling said housing to be rolled disbursed on said housing.
3. The container of Claim 2, further comprising a first handle extending generally upwardly from said housing.
4. The container of Claim 3, further comprising elevation adjusting means attached between said platform and said housing, said elevation adjusting means configured to move said platform along said height.
5. The container of Claim 4, wherein said elevation adjusting means comprises at least one biasing device.
6. The container of Claim 1, further defined by a tray extending from said housing.
7. The container of Claim 6, wherein said housing is defined by a pair of side walls and said tray further comprises an attachment device attached to each said side wall.
8. The container of Claim 7, wherein said attachment devices comprise pivotable connections between said tray and said side walls.

9. The container of Claim 7, wherein said housing is further defined by a front wall, said container further comprising a second handle extending from said front wall.
10. The container of Claim 9, further comprising at least one auxiliary container disposed on at least one said side wall or front wall.
11. A combination vendor pet food package and mobile pet food storage container, the combination comprising:
 - a vendor pet food package comprising a bag defined by a bottom, a top and an opening at said top; and
 - a mobile pet food storage container comprising a housing defining a main chamber, at least one wheel extending from said housing and a platform configured for resting said package thereon, said platform attached to said housing in said main chamber.
12. The combination of Claim 11, wherein said mobile pet food storage container further comprises a tray hingeably attached to said housing.
13. The combination of Claim 12, wherein said housing is further defined by a rim creating an opening for accessing said main chamber, said mobile pet food storage container further comprising a lid attached to said housing.
14. The combination of Claim 13, wherein said lid further comprises a sealing gasket means for creating an airtight seal between said lid and said housing.
15. The combination of Claim 14, wherein said mobile pet food storage container further comprises a first handle, said first handle attached to said housing by at least one telescoping strut extendable therefrom.
16. A mobile pet food storage container, comprising:

a housing defining a main chamber and an opening for accessing said opening, said main chamber defining a height;

a platform movable along said height;

elevation adjusting means attached between said platform and said housing, said elevation adjusting means configured to move said platform along said height;

a tray extendable from said housing; and

a lid configured to cooperate with said housing to close said opening.

17. The container of Claim 16, wherein said housing is defined by a pair of side walls and said tray further comprises an attachment device attached to each said side wall.

18. The container of Claim 17, wherein said attachment devices comprise pivotable connections between said tray and said side walls.

19. The container of Claim 18, wherein said housing further comprises at least one rolling means for enabling said housing to be rolled disbursed on said housing.

20. The container of Claim 19, further comprising a first handle extending generally upwardly from said housing.
